

Installation Instructions

1 Protect the countertop by placing painter's tape around all openings.

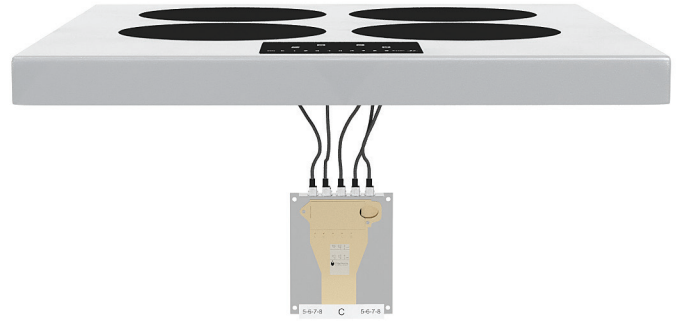

2 Apply a liberal amount of adhesive (supplied) to the lip inside the cutouts.

3 Place each unit inside the cutouts. Press down firmly so that the adhesive squeezes over the opening and each unit makes full contact with the base.

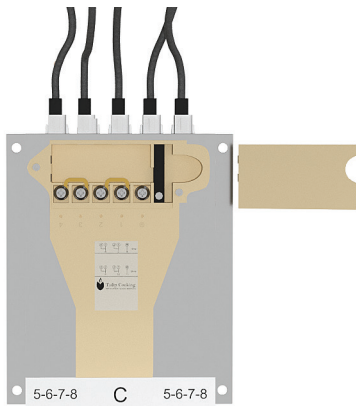

4 Allow *at least 24 hours* for the adhesive to dry. When dry, remove painter's tape.

(Over)

5 Use a sharp razor to carefully trim any excess adhesive above the plane of the countertop.

6 Attach the electrical leads to the power supply.

7 Attach 220 Volt power to the terminal.
IMPORTANT: This step must be done only by a licensed electrical contractor.

8 Program the unit in accordance with the Tulip Cooking User Guide, and enjoy using your induction cooktop.
